Welcome to Crestron's CLC-S!

*(Commercial Lighting Control Systems – Intro
for Specifiers)*

***In the month of Valentine's Day, learn to
love lighting controls!***

Crestron welcomes Electrical Engineers, Lighting Designers, Architects, Electrical Contractors & Distributors

***"Intense training, fun atmosphere, and
well worth the trip!"***

Crestron has taken a 5 day intensive training & packed it into 2 week days. The class is updated each month with new technology. We understand that in this challenging economy getting away for a few days is hard to do. But, we promise that this training will be well worth your time.

The training class will cover:

- Overview of all Crestron lighting control products
- Programming & commissioning demonstrations
- Example solutions for common commercial applications
- Factory tours
- 2 continuing education seminars - AIA/CES (HSW & SD) on Energy Codes, Integrated Building Technology, and Daylight Harvesting
- 10 total continuing education hours

***Be a part of this unique opportunity for
commercial industry professionals from all over
North America to come together and learn
about the latest innovations in lighting controls.***
